Ramez Gamel

Front-end developer

Skills

Front end
React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Sass

Libraries
TanStack Start, Router and Query, three.js, Recharts, shadcn/ui, Radix

Interface craft
Responsive layouts, accessibility, right-to-left Arabic interfaces, animation, View Transitions, light and dark themes

Data in the browser
IndexedDB, localStorage, REST APIs, local-first sync, canvas

Testing and tools
Vitest, Playwright, Vite, Git, GitHub Actions, Vercel, Cloudflare, GitHub Pages

Education

BA, English Department
Zagazig University, 2019–2023

Languages

Arabic (native), English (fluent)

Certifications

Frontend Development (React.js)
Computer Essentials

Front-end developer who builds fast, accessible interfaces in React and TypeScript, in English and Arabic. I've shipped a local-first time-tracking app, a film search you can browse by color and in 3D, a task manager and a booking site built in pure HTML and CSS, each live with a written case study.

Projects

WorkLedger — 2026

React, TypeScript, Vite, IndexedDB, Recharts

- Time tracking and invoicing app: one record of work sessions drives the timesheet, earnings chart, invoices and PDF reports.
- Local-first with IndexedDB and cloud sync; public demo with sample data, light and dark themes, 20 automated tests and CI.

ramezgamel01.github.io/workledger

CineScope — 2026

React, TypeScript, TanStack Start, three.js, Tailwind CSS

- Movie app where you find films by color: a color wheel, photo matching that runs in the browser, and a 3D color universe in three.js.
- Movie pages tinted by each film's palette, View Transitions between pages, and motion that respects reduced-motion settings.

cinescope-gamma-ruby.vercel.app

TaskFlow — 2026

React, TypeScript, TanStack Start, Tailwind CSS, shadcn/ui

- Task manager with a progress dashboard, filtered views, search and themes; tasks are saved in the browser, with no account needed.
- Server-rendered with identical client markup; found and fixed a hydration error that depended on the visitor's time zone.

task-flow-alpha-navy.vercel.app

Rihla — 2026

HTML, CSS

- 18-page bus booking site for Egypt with trip search, a three-step checkout and a bookings dashboard.
- Seat selection, a live seat count and the price total built with checkboxes, :has() and CSS counters, with no JavaScript.

ramezgamel01.github.io/rihla-egypt-travel

Portfolio 2026

HTML, CSS, JavaScript

- Bilingual Arabic and English site with a right-to-left layout, light and dark themes, a Ctrl+K command menu and case studies.
- Scroll and 3D effects that switch off for reduced-motion settings, with a toggle to turn them back on.

Experience

Front-End Developer, React 2023 – present

Freelance

- Build responsive interfaces in React, JavaScript, HTML and CSS, turning product requirements into working web experiences.

Other experience

Software Engineer, Python Dec 2023 – present

Freelance, remote

- Django and FastAPI services on PostgreSQL, with Docker, GitHub Actions and automated tests.

AI Data Trainer and Reviewer 2022 – present

Data Annotation, Outlier, Remotasks

- Wrote, reviewed and rewrote Arabic and English model answers, including answers to software engineering questions.

Vodafone UK and Teleperformance 2022 – present

- Customer service, then telesales and retention at Vodafone UK (2022–2025); repeatedly recognized as a top performer.
- Back-office operations at Teleperformance since 2025; recognized three times as a top achiever.

An Arabic version is available on my portfolio.
